# Overview

SLOGAN

## Innovation & Development

As a global total logistics corporate, SHINHAN Sea and Air Cargo Inc, leads the global total logistics fields including marine transportation, air transportation, bonded transportation, bonded warehouse, storage, bulk-project cargo, 3PL, and Eurasia rail transportation. With the best specialists in various sectors, we have grown every year since its foundation in 2009.

We accelerate new services including TSR/TCR/TMGR/TIR with the expansion of our business based on the partnership with globally recognized enterprises into the Americas, Europe, China, Asia and Far East. Wherever you are, no matter what cargo it is, we provide you with the best service to meet your needs and the characteristics of your cargo.

We can also guarantee quickness and accuracy from the real-time information on the status of all cargo with high-tech security, and observation system and systemic Overseas Networks.

We offers one-step-in-front service to convert our service to your competitiveness and continue to find a market based on the analysis on changing international logistics context and its trend. At the same time, we are trying to leap forward the future with the future-leading logistics network research and the constant investment on expert personnel training.

We promise to give you the best satisfaction with our expertise defying comparison, accumulated know-hows, and zero-margin-of-error service.

SHINHAN Sea and Air Cargo Inc.

# CEO Message

*The Logistics,  
Our next future*

SLOGAN Customer's Expectation, the Future of Logistics

Thanks for visiting SHINHAN Sea and Air Cargo Inc, The People who open the way.

Thanks to your consistent interest and support, SHINHAN Sea and Air Cargo Inc. is becoming one of leading groups to play a pivotal role in Korean logistics industry.

Today, we refresh our mindset and attitude to treat you, our customers, humbly as we believe that 'global logistics' should be responsible for your cargo which is your inevitable fruition going through a series stages of development, purchase, manufacturing and find markets based on the market principle of demand and supply.

With this resolution, we promise to be faithful to our originally assigned duties.

In addition, we want to focus on our role as a responsible global logistics service provider, grown up with our customers by coping with changing logistics paradigm effectively.

Furthermore, we will realize the future following the logistics in the competition with other global rivals with our cutting-edge logistics IT and network development, professional talent training and continuous investment on R&D.

Thank you.

C.E.O of SHINHAN Sea and Air Cargo Inc.

# Business Area

## Marine Transportation/Air Transportation

SHINHAN Sea and Air Cargo Inc. made Prime Service Contract with globally recognized shipping companies and made partnership with major domestic and international logistics companies. So you can enjoy the special benefit of SHINHAN Sea and Air Cargo Inc. together.

With our liason networks in every continent and Cargo Networks with the agencies all over the world, we controls the entire process of marine transportation systematically. We are proud of our high customer satisfaction with customized services including supply of equipment suitable for cargo characteristics, SOC/COC and LCL Consolidation.

The proportion of air freight becomes greater in the international transportation market and its form is innovatively converted to 4 parties' logistics(4PL) from 3 parties' logistics(3PL). SHINHAN Sea and Air Cargo Inc. can provide you with the secured space and competitively discounted cargo rate thanks to the stable contracts with the domestic and the foreign airlines.

In addition, we offers more systematic and professional air freight services; a variety of Door to Door Service such as IATA service-oriented First/Second Carrier, Air Consolidation and Sea & Air Service linked with multi-modal transport, etc.

# Business Area

## Inland Transportation

Project Cargo Service

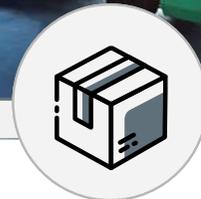

For the special cargos like over size, break bulk, and project cargo, the service is made via close cooperation with shipping companies and airlines in order for better work accuracy. In addition, we have project cargo specialists guarantee the safety of the cargos and treat them at the site in order to make it with minimum cost.

Container Transport (FCL)

We can connect the most optimized transportation mode and routes with the international standard based containers in our exclusive wharfs, located in major ports throughout the country and a variety of infrastructure and cutting-edge systems such as ICD, CY, DFS so that we provide the most safe and efficient container transportation service.

LCL Cargo Transport

Our equipment and manpower are always ready for various general cargos. LCL freights, in particular, are collectively transported to the assigned CFS via collection service in central region.

Railway Transport

For bulk cargos, we use our railway network to moved them to railway container yards and inland container depots in Busan, Chochiwon, and Uiwang.

# Business Area

## Logistics Center / Bonded Warehouse

SHINHAN Sea and Air Cargo Inc. went through strict assessment process under control of its central control center to make strategic partnership with the logistics centers that have high-tech IT system, global logistics control system and efficient inventory system in place. We are also trying to preserve the original status of cargos and save the logistics cost by assigning the most safe and appropriate warehouses in consideration of the nature of the cargos.

Hi-Tech IT System

화물의 안전을 최우선 하여 내, 외부 보안설비를 완비, 최첨단 24h 현장 감시체계를 수립하여 운영하고 있습니다.

Global combined logistics control system

국가와 지역에 한계 없이 화물의 특성을 파악하여 위치와 보관에 가장 유리하고 적합한 창고와 계약을 통해 이를 통합적으로 관리, 운영하고 있습니다.

WMS / EDMS

Warehousing Management Systems  
Electronic Document Management systems  
WMS, EDMS를 통한 화물 메니징을 단순화, 간소화하여 효율적 관리를 극대화하고 있습니다.

Frozen / Refrigerated

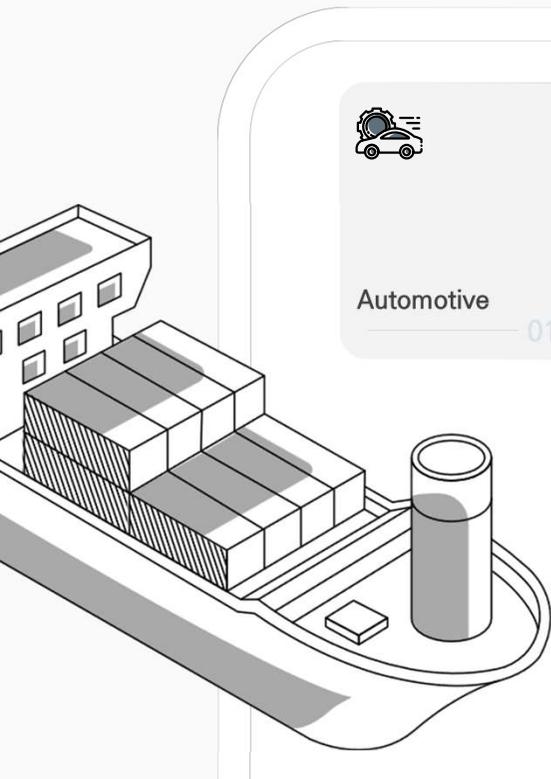

소비자 수요의 다변화, 다각화에 따라 신선식품, 가공식품 등 원상태 보존과 함께 신선도를 유지하며 안전하게 관리되고 있습니다.

# Industrial Solutions

In a rapidly changing industrial environment, customers' business needs are also diversified and segmented. SHINHAN Sea and Air Cargo Inc. understands our customers' businesses in depth and provide them with customized logistics solutions. Our services are now expanded to a variety of industrial sectors.

We allocate the industry-specific professionals to predict the corresponding industrial requirements in advance for constant research on their responses which make us provide our customers with the best value and competitiveness. SHINHAN Sea and Air Cargo Inc. is a close partner of our customers, not just a logistics service provider.

# Specialized Service

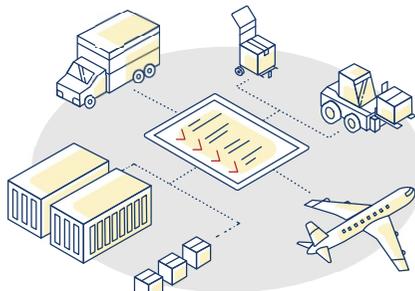

## Import Specific Transport Service, Auto Parts, DG Cargo

01

### Import Specific Transport

Import and export are not contrary concepts each other and the both tasks have their own characteristics. However, as most exporters are in charge of import logistics, the importers' detailed needs have not been met often.

SHINHAN Sea and Air Cargo Inc. surveyed importers for these complaints to provide import specific transport service. We have improved and made up with what other forwarders haven't been noticed so far based on the accurate understand of importers' requirements. We have already gained imperative trust from many importers for the convenience of our service in terms of the logistics for import.

02

### AUTO PARTS

Our major customers in this sector are some domestic/foreign vendors supplying auto parts to automobile production plants in North and South America. We share the space with local logistics centers, selected based on our strict assessment criteria for common requirements of the auto market buyers: competitive logistics cost, stable inventory, and On Time Delivery.

This service system is integrally controlled by the connection with a variety of management systems and the unified logistics center information such as EDI, delivery/warehousing management, safety stock, storage method and Milkrun etc.

- IMMEX bonded warehouse
- Deposito Fiscal
- VMI (Vendor-Managed Inventory)
- EDI
- On-Time Delivery
- MEX Warehouse - Monterrey, Leon-Silao, Puebla
- USA Warehouse - Detroit, Montgomery, Georgia, Nashville

03

### DG Cargo

More dangerous goods transportation has also been made these days where the demand for various products is increased. SHINHAN Sea and Air Cargo Inc. allocate specialists who completed dangerous goods session on the sites for classification, packing, marking, labelling and paperworks (for DG reporting) in a quick and accurate manner in accordance with the regulations for dangerous goods transportation.

They identify the properties of dangerous goods such as explosive substances, flammable substances, flammable gases, corrosive substances, toxic substances to comply with UN International Maritime Transportation (IMO) Rules, International Civil Aviation Organization (ICAO) Regulations, Basel Treaty by UNEP (International Nuclear Power Agency), and Radioactive Material Transport Regulations for transportation.

- All chemicals defined in DGR and IMDG Code (Class 1/2/3/4/5/6/8/9)
- Radioactive substances (Class 7)
- Blood, Bio and Transmittable substances (Division 6.2)

# Specialized Service

## Triangular Transport Service, Project Cargo Transport, Eurasia Railway Transport

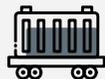

### Triangular Transport

SHINHAN Sea and Air Cargo Inc. provides triangular transportation service for the export/import cargos on a wide range of global networks. This is for the speedy and systematic one-stop logistics services such as Cargo Movement, Switch B/L, Negotiation for the delivery from Asian countries like China, Vietnam, India to the 3rd countries in Americas and Europe. In this triangular transportation, we issues Switch B/L to the relay exporters in the country where the actual shipment is made in order not to release the information on original exporter.

### Project Cargo Transport

For Engineering, Procurement and Construction project logistics, we provide Total Turnkey service from shipment to final Job Site for domestic and foreign EPC contractors. For super-heavy cargo transport, requiring special equipment and preparation, EPC contractors are involved before the order to organize the detailed plans per each stage in consideration of cargo type, safety, appropriate routings, and pre-Road Survey. In addition, it is proceeded via Simulation with the diversified analysis on custom clearance, legislation, customs etc. in the country of destination. Comprehensive consulting service is also provided for the most efficient means of transportation with reasonable price.

### Eurasia Railway Service

SHINHAN Sea and Air Cargo Inc. developed "Eurasia Railway Service" to reduce the elapsing time for the transportation between Europe and Korea to 18 days along with 98% on-time ratio. Based on the optimal railway network organized over a long period of time; researches on customs regulations for passing borders, railway connection methods, schedule, and control system; and the sufficient actual pre-transportation, we were able to sign contracts with the largest railway companies in Europe and Russia. Customers' complaints about skyrocketed airfare and the delay of marine transportation were sorted out efficiently and, in responding to this benefit, we have now had more customers. With our Eurasia Land-Bridge transport service, the logistics between Europe and Korea is getting closer connection.

# International Networks

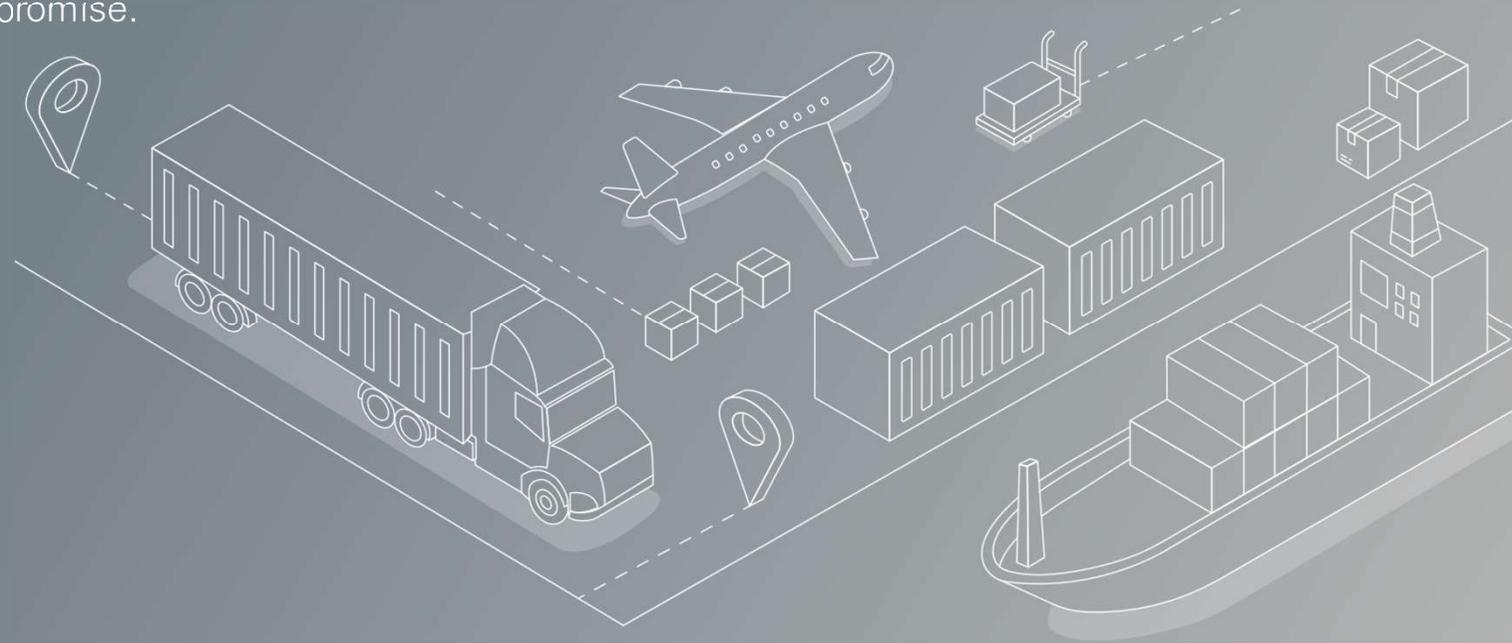

SHINHAN Sea and Air Cargo Inc. has flexible logistics networks for quick and safe transportation without geographical limit with its overseas offices (branches), the partnership/agency contract with professional Freight Forwarder (NVOCC) and the membership of distinguished global associations.

*Adding value to the cargo*
